Short description of office	Universidad Politécnica de Madrid (UPM) is the oldest and largest technical university in Spain. It consists of twenty Schools plus two Faculties that cover most engineering disciplines as well as Architecture and Sports Science. UPM has more than 3,000 faculty members, around 38,000 undergraduate students, and around 8,000 graduate and doctoral students. About 5,000 students graduate every year from UPM. The University's main goals are higher education and research. To achieve these goals, the Schools and Faculties deal with teaching whereas research groups (201), specialized technical centres (10), and university institutes (6) are devoted to research. UPM enjoys a high participation in EU-funded projects. In fact, it has had the highest participation among European universities in FP4, FP5 and FP6. In particular, the University performed more than 210 R&D projects within FP6 (2003-07), being the first Spanish University in number of awarded projects. As for the FP7 (2009-2013), so far UPM has been awarded with 113 R&D projects, moving UPM into the first place among Spanish universities.
